

Zhen Qi

Homepage: <https://zhenqi-stat.github.io/>

Email: qizhen246@ruc.edu.cn

Education

Ph.D. Students in Statistics

2024 – Present

Institute of Statistics and Big Data, Renmin University of China, China

Advisor: Yuqian Zhang

B.S. in Mathematics and Applied Mathematics

2020 – 2024

School of Mathematical Sciences, Beijing normal University, China

Research Interests

- Causal Inference
- Semiparametric theory
- High-dimensional Statistics
- Semi-supervised Learning

Publications

- **Zhen Qi**, Xu Guo, and Haobo Qi (2026). Distributed learning for high-dimensional factor augmented regression models. *Statistics and Computing* 36, 15.

Preprints

- **Zhen Qi** and Yuqian Zhang (2026). Quadruply robust methods for causal mediation analysis. arXiv preprint arXiv:2601.22592. **Major revision** at *Journal of the American Statistical Association* (JASA).
- **Zhen Qi**, Facheng Yu and Yuqian Zhang (2026). Semi-supervised inference using unlabeled summary statistics. arXiv preprint arXiv:2411.15691.

Presentations

- The 4th Joint Conference on Statistics and Data Science & IMS-China July 2026

Awards and Honors

- Outstanding Graduate, Beijing Normal University June 2024

Teaching

Teaching Assistant, Renmin University of China

2025 – Present

Statistical models and inference II (PhD level)

Spring 2026

Probability Theory and Mathematical Statistics C (undergrad level)

Fall 2025
